

DMP requirements

for public funding organisations

A DMP is a Data Management Plan. Almost all funding organisations require researchers to write a DMP when they receive funding.

A DMP requires a researcher to actively think about research data management (RDM). RDM planning is the first step in making research data findable, accessible, interoperable, and reusable (FAIR).

What are the different requirements for writing a DMP for public funding organisations?

website links →	NWO	H2020	ERC	ZonMW	KNAW
Open access policy?	open as possible, closed if necessary	as open as possible, as closed as necessary	as open as possible, as closed as necessary	open access or restricted access	Data generated by publicly funded research is a public asset (...) If Academy researchers deviate from these principles, they explain why.
DMP requested?	within four months after being awarded	within the first six months of the project	within the first six months of the project	after being awarded	no
Template available?	yes	yes	yes	yes	no
DMP part of evaluation?	no	no	yes	subject to feedback	no
Which data should be made available?	All data and metadata	All data and metadata	Data collection and metadata	Data collection and metadata	Data and its processing software

ERC adjusted for 'DMP requested', 16-12-2019, by H. Andrews, TU Delft
v3.0, 26-1-2019, by Marjoleine Sloos, Fryske Akademie (KNAW)
revision of v2.0, 26-1-2018, by Jasper van Dijck, TU Delft
