

How can we help DCCs in relation to software sustainability?

DCC-praktijkgericht onderzoek: Mee ontwikkelen van trainingen + expertise inbreng op dit onderwerp

Provide training overview and details in format for data stewards

Archiving software is a very specialized topic, which we now at a central level don't have the knowledge of. The basics in archiving software for support staff would be very useful!

awareness zoals nu gepresenteerd wordt, is belangrijke eerste stap om brede bekendheid van services en bereidheid om te delen/samen op te trekken te vergroten. Presentaties per instelling misschien?

single-point-of contact om gericht vragen te kunnen stellen

Ondersteuning tricks om decentrale software engineering kennis binnen DCC te krijgen. Decentrale afdelingen kunnen terughoudend zijn.

Basic training on github, zenodo.

Samenwerken in teams. Poolen van expertise.

No specific ideas/requirements, yet. I do like the "train the trainers" approach. That's scalable and help making the DCC's independent and "self-contained".

How can we help DCCs in relation to software sustainability?

Provide training and workshops/webinars for RSEs within research institutions
